 **WIRTGEN**

“Thanks to selective extraction, Wirtgen surface miners achieve high degrees of material quality with optimal exploitation of mineral deposits.”

### Wirtgen Surface Miners

Wirtgen supplies surface miners in a variety of performance classes for the selective mining of raw materials, such as coal, limestone, bauxite, gypsum, salt and phosphate.

In addition to mining, these machines can also carry out routing operations for the construction of mining service roads and railway tracks, the rehabilitation of roadways and installation of tunnel floors.

The range of applications further includes the precise cutting of trenches and channels as well as surface leveling.

### On-site support; technical service

With offices in Conakry and a team of regularly and highly trained specialists, well identified with the mining sector, MOVICORTES GUINEA MINING provides complete on-site services to the customers, at any time, even for the toughest issues!

Using state-of-the-art equipment, with high-quality special-purpose tools, diagnostic software for fault analysis and optimised work processes, we provide technical support directly at the mine, ensuring that the Wirtgen machines are back up and running in the shortest possible time.

MOVICORTES GUINEA MINING service also includes preventive system inspections to ensure reliable operation.

### Parts

Wear and spare parts represent the largest share of the operating costs of a surface miner. We draw on our knowledge and Wirtgen experience to provide customers with the solutions they need, at the best price and in the shortest possible time.

Nothing can compare to genuine Wirtgen spare parts. Designed to perfectly meet the needs of both operators and the machines, they stand out thanks to their long service life, outstanding quality and easy installation.

### Training

Movicortes Guinea Mining technicians are specialists in their field and have decades of application experience. Our customers in Guinea benefit from this expertise, because we are happy to pass our knowledge on to them in our training sessions.

With our wide range of training programmes on operation, applications, maintenance and technology, we train operators, technical services and on-site managers to use Wirtgen surface miners effectively and profitably.
